The Value Care Team

Intelligent Care System

Overview

The Value-Based Care Conference 2026 is a high-level, multi-stakeholder platform focused on advancing the implementation of value-based healthcare models in South Africa.

Under the theme **"Complexity, Collaboration, Clarity,"** the conference will explore:

- The urgency of transitioning to value-based healthcare models
- Clinical and patient-care benefits of VBC
- Regulatory and reimbursement frameworks, including PMB considerations
- Provider experiences, particularly in underserved communities
- International lessons: successes and challenges in VBC implementation
- Complexities of value-based payment systems

The programme features expert presentations, case studies, and panel discussions designed to deliver both strategic insight and practical application.

Benefits of Attending:

- Articulate the clinical and economic value of Value-Based Care
- Identify practical implementation strategies tailored to their organisations
- Understand the regulatory landscape influencing VBC adoption
- Evaluate value-based payment models and their applicability
- Address challenges in diverse and under-resourced settings
- Apply international and local insights to decision-making
- Build strategic partnerships for integrated care delivery
